

Thank You for using this Child Theme from Aspen Grove Studios

In this file, you will find step by step instructions explaining the process of Login Customizer for your child theme. Please let us know if you have any questions or comments about the theme. You can contact us at support@aspengrovestudios.com

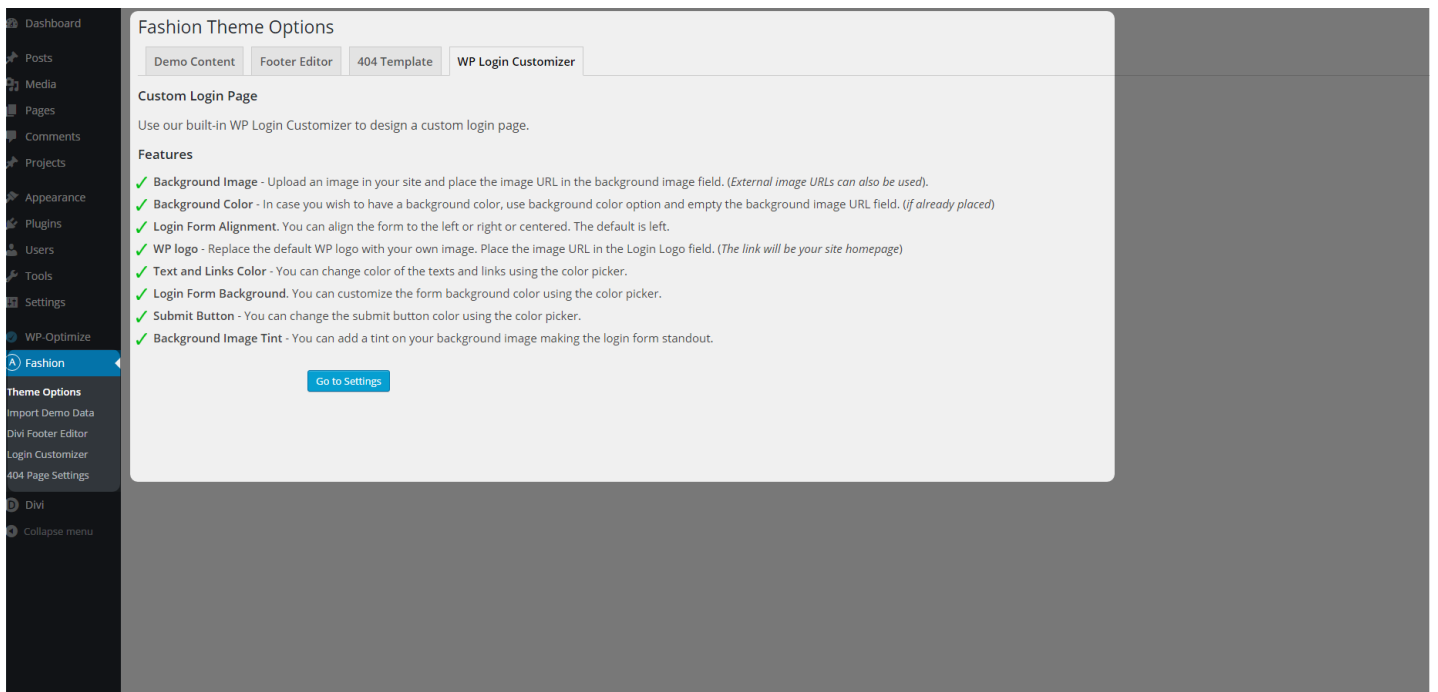

This Child Theme comes with a built-in customizer for the WordPress login area.

Once the theme is installed, you will be able to create a custom designed login area (wp-admin) like the example below. Pretty cool, right?

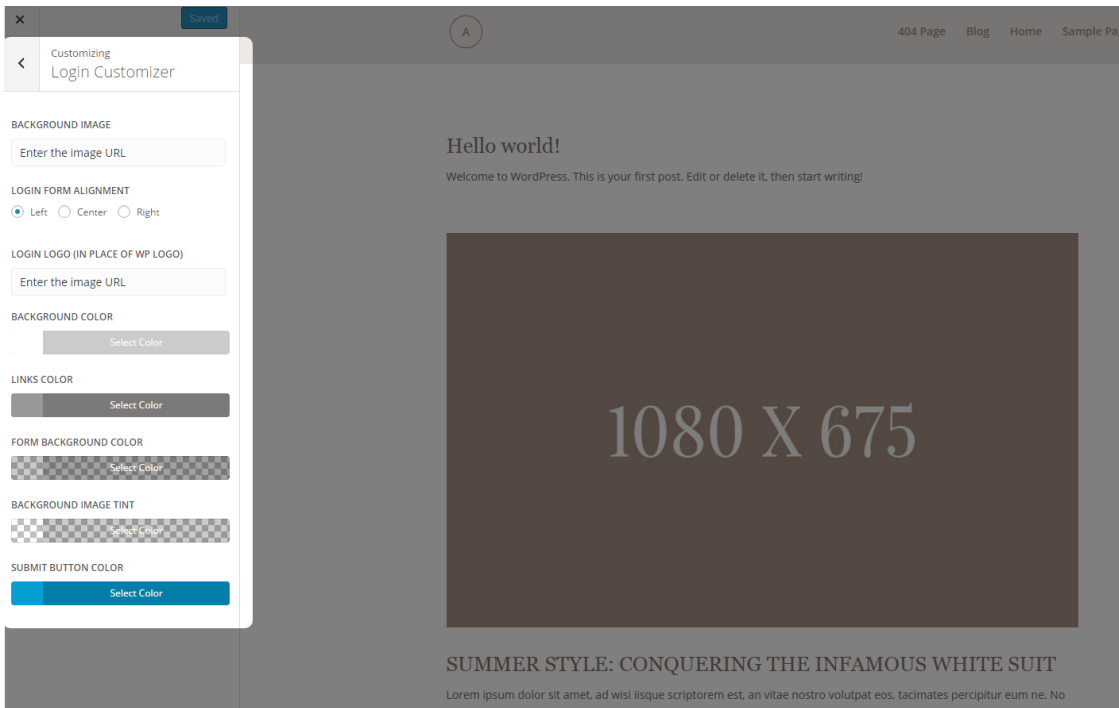

Let's design this page

Please click the **Theme Options Page** admin menu. Navigate to **Login Customizer** link.

This page will give you all the information as how you can style your Login area. Please click the **Go to Settings** button or click on the **Login Customizer** link under Fashion theme options.

Inside the customizer panel, click Login Customizer tab. Change the settings accordingly.

Features

✓ BACKGROUND IMAGE

You can set a background image just like the example shown above. Upload a big image (*preferably 1920px x 1280px*) to your site using Media upload button. Copy the image URL and paste it in the BACKGROUND IMAGE field. Empty the field and then place the URL. You can also use an external image URL for this.

✓ LOGIN FORM ALIGNMENT

The default login form in this theme is to the left. You can align this to the right or keep it centered.

✓ LOGIN LOGO (IN PLACE OF WP LOGO).

Place your logo image (*preferable dimension 64px x 64px*) URL in this field. The current Aspen Grove Studios logo will be replaced with yours. The login link will be site homepage instead of wordpress.org

✓ BACKGROUND COLOR

You can also choose to use a solid background color. Please empty the background image URL field (*if already placed*) and choose any color from the color picker. The default color is transparent.

✓ **LINKS COLOR.**

You can also customize the links color on this form. Choose any color from the color picker.

✓ **FORM BACKGROUND COLOR**

Customize the background color of the form using the color picker.

✓ **BACKGROUND IMAGE TINT**

If you add a background image and need to stand out your login form, you can add tint to that image. Use the color picker and choose anything. Use opacity option to make it a tint.

✓ **SUBMIT BUTTON COLOR**

You can also customize the background color of the submit button using the color picker.
